

Ralph Rallion Laynes

Full-Stack Web Developer | Laravel | PHP | Vue.js | AI Automation

Dubai, UAE, Al Rigga

ralphlaynes@gmail.com

+971551620531

Summary

Full-stack web developer with 6+ years of commercial experience building production-ready websites, portals, dashboards, booking systems, event platforms, APIs, and automation workflows. Strong background in PHP, Laravel, CodeIgniter, MySQL, Vue.js, WordPress, Docker, Nginx, deployment, website hardening, and performance optimization.

I bring hands-on experience across UAE and international projects, with a practical security mindset supported by CompTIA Security+ and Network+ certifications. Recent work includes web operations for live sports/iGaming platforms, Docker-based environments, Nginx configuration, SSL/TLS setup, virtualization workflows, and AI-enabled tools using prompt engineering, Hugging Face, RAG concepts, N8N, and Zapier.

Experience

Web Developer

Bab Alomda Information Technology Corp., Dubai, UAE

Mar 2026 — Current

- Maintain, optimize, and deploy websites for the iGaming industry with a focus on reliability, security, performance, and production uptime.
- Create and update web platforms, landing pages, backend modules, and operational tools to support fast-moving business and marketing requirements.
- Run Docker-based environments and support virtualization workflows for development, testing, deployment, and server operations.
- Configure and maintain Nginx web server setups, deployment processes, domain routing, SSL/TLS configuration, and performance optimization.
- Apply website hardening practices including access control, server configuration review, vulnerability reduction, secure deployment habits, and ongoing monitoring.

Web Developer

Emirates Scholar Research Center, Dubai, Dubai

Sep 2022 — Mar 2026

- Developed, maintained, and enhanced client websites, portals, booking systems, dashboards, and event platforms using PHP, Laravel, CodeIgniter, WordPress, JavaScript, and Vue.js.
- Translated client requirements into technical specifications, database structures, user flows, and functional system architecture.
- Built custom features including registration workflows, content management tools, multilingual pages, lead forms, and admin dashboards.
- Integrated APIs, automation workflows, and third-party services to reduce manual work and improve operational efficiency.
- Provided production support, bug fixing, deployment assistance, and live-event technical support for business-critical platforms.

Web Developer

Lucy Security/ThriveDX, Tayabas, Quezon Province

Apr 2020 — Aug 2022

- Developed e-learning websites and interactive security awareness content using HTML, CSS, JavaScript, and ReactJS.

- Built phishing simulation pages and training flows using PHP, HTML, CSS, and JavaScript to support cybersecurity awareness programs.
- Updated, designed, and maintained client-facing web content based on campaign and training requirements.
- Analyzed client needs, documented technical requirements, and coordinated content localization for multilingual audiences.
- Created Rise Articulate lessons and user education materials focused on phishing, malware behavior, and prevention best practices.
- Supported WordPress website updates, troubleshooting, and content improvements for company and client properties.

Education

Information Technology Coursework - Business Analytics Focus, Information Technology, Lucena, City, PH, Jun 2015 — Jun 2019

Manuel S. Enverga University Foundation

Relevant coursework and hands-on projects in PHP and jQuery web development, business analytics, desktop applications with Java, C#, and .NET Framework, and Unity-based 3D game creation.

High School Diploma, Pagbilao, Quezon, PH, Jun 2011 — Jun 2015

Casa Del Nino Jesus De Pagbilao

Skills

- **Advanced Laravel knowledge**
- **PHP programming**
- **Javascript**
- **RESTful web services**
- **MySQL database management**
- **AI Automation**
- **Retrieval-Augmented Generation & Prompting**
- **WordPress REST API**
- **WordPress design**
- **IT security awareness**
- **PHP Programming**
- **WordPress Custom Plugin**
- **Website Hardening**
- **Vue.js Integration**

Certifications and Licenses

CompTIA Security+ (**SY0-701**) & CompTIA Network+ (**N10-009**)
